ABOUT ME

I am Mark Herren Diaz Nuega, age 41, Electronics and Electrical Technician since year 2009 (16 years on Technical In-House & Field Service).

Always willing to take initiative with responsibility on all my duty and schedules with all my dedication and hardworks ready at all times.

Always wanted myself to take challenges resolving issues and problem usually a company is facing difficulties and see the maximum ability and potential I have in myself as an active worker and leader to any group that I may become a part or to lead.

I have a lot of experiences gained thru difficulties and failure to success that is ready to be used for the benefits of many.

My dream is not just for myself but for everyone I am with and I am caring for.

Always aiming high whether it is thru the hardship or challenges and difficulties, knowing that after going over to this kind of experience I will learn and correct faults and mistakes in my next step...

Also had a lot of experience from laboring to supervisory level, therefore I knew the actual scenario on the field where most worker should be knowledgeable and skilled to do their task on time and on a high standard of service.
